SUMMARY

Frontend Developer with hands-on experience building production SaaS applications using React.js, Next.js, and TypeScript. Experienced in REST API integration, multi-role dashboards, authentication/RBAC, payments, and business-driven workflows.

PROFESSIONAL EXPERIENCE

Saudi Car Auctions Platform (AutoZad) 🔗 Frontend Developer - Built customer-facing and dashboard features using Next.js, React, TypeScript, and Material UI. - Translated business requirements into frontend workflows for car listings, auctions, user actions, and multi-step processes. - Integrated REST APIs and collaborated with backend and product stakeholders on business-driven platform decisions.	05/2026 – Present Saudi Arabia
AlexApps (Full-time Remote work) 🔗 Frontend Developer - Built React.js/Next.js SaaS dashboards across service management, offers, and restaurant platforms, integrating REST APIs and business workflows. - Implemented authentication and RBAC flows for multi-role applications, including OTP login, protected routes, permission-based navigation, and user actions. - Integrated Tap Payments and delivered multi-step onboarding and registration workflows with validation, shared state, and backend-driven business rules. - Developed data-heavy dashboard features including server-side filtering, pagination, debounced search, bilingual AR/EN interfaces, and approval workflows.	05/2025 – Present Alexandria, Egypt

EDUCATION

Faculty of Computers and Informatics, Minya University. 🔗 Bachelor's degree in Computer Science.	10/2020 – 07/2024 Minya, Egypt
Graduation Project: Used Books Marketplace (Awarded A+) Built a full-stack platform to resell used books with AI-powered quality assessment.	

TECHNICAL SKILLS

Frontend Core: React.js, Next.js (App Router), TypeScript, JavaScript (ES6+), HTML5, CSS3

State & Data: Context API, React Hook Form, Yup, Axios, RESTful APIs

Rendering & Performance: Server Components, SSR, CSR, Lazy Loading, Code Splitting

UI & Styling: Material UI, Bootstrap, Responsive Design, RTL/LTR Support

Tooling & Workflow: Git, GitHub, Figma, Jira, Agile, Postman
